

Protocol for the conduct of outdoor athletics competitions – indoor 2022

Entry to Slovenia

For all important information on how to enter Slovenia, please follow this link

<https://www.policija.si/enterslovenia/en>

Organization of the competition

The PCT condition is compulsory for all participants in sport competitions over the age of 12.

All attendees must show one of the following certificates before entering the event area:

- a certificate of a negative SARS-CoV-2 test result by polymerase chain reaction (PCR) not older than 48 hours or rapid antigen test (HAG test) not older than 24 hours from the time the swab was taken
- proof of vaccination against COVID-19, showing that the person has been vaccinated: *two doses of Comirnaty vaccine from Biontech/Pfizer, Spikevax (COVID-19 Vaccine) from Moderna, Sputnik V vaccine from Russia's Gamaleya National Centre of Epidemiology and Microbiology, CoronaVac vaccine from Sinovac Biotech, COVID-19 Vaccine from Sinopharm, Vaxzevria (COVID-19 Vaccine) by AstraZeneca, Covishield by Serum Institute of India/AstraZeneca or Covaxin by Bharat Biotech (India) or a combination of two of the above or a single dose of COVID-19 Vaccine Janssen by Johnson and Johnson/Janssen-Cilag. ,*
- proof that the person has recovered from COVID-19 and that no more than 180 days have elapsed since infection.
- Evidence that the person has had a COVID-19 vaccine and has been vaccinated against COVID-19 disease with a single dose of one of the vaccines recognised in Slovenia within 180 days of the positive PCR test result or the onset of symptoms at the latest.

Verification of compliance with this condition is carried out by consulting the relevant document and presenting a valid identity document at the entry points.

Persons who do not fulfil the PCT condition shall not be allowed to participate or attend the activity.

The use of a protective mask is **compulsory** when moving and staying in all enclosed public places or areas, except during warm-up and competition, where the PCT condition applies.

The secretariat of the competition must be organized in such a way that one representative of the club enters individually and makes all the necessary arrangements (payment, start list with technical instructions, start numbers). Entry is only allowed with a mask. The results are published by the Secretariat only on the notice board and on social networks. The surface area of the results board should be as large as possible. The start list is published electronically only.

The call room must be organized to have enough space (more than before). Only one group of competitors at a time shall be in the entry box. Especially in the entry hall, a distance of 2 m at the control must be observed. After the control, sufficient space must be provided for waiting to enter the competition area.

All officials shall, where necessary, remind the athletes to keep an appropriate distance between themselves.

Strict control should be exercised to ensure that only "accredited" persons are inside the competition areas and no one else.

Competitors should leave the competition area in the direction of not meeting incoming competitors.

Spectators are NOT allowed at competition.

Spectators are only allowed in areas with fixed seating and one seat must be vacant between participants, the use of protective surgical or FFP2 masks is mandatory.

As there is no marked seating in the auditorium, spectators are not allowed.

Athletes

The principle of arrive - perform - leave applies.

Athletes must be asked to observe their own socially adapted distribution, this also applies to referees and technical staff.

Technical disciplines

Provide sufficient benches on the competition area for athletes to sit at an appropriate distance from each other. A tape measure should be provided at the crash marks so that athletes can measure their own run-up.

Trial jumps/throws shall be conducted according to the start list.
